

DIVYANSHU N SINGH

me@thatdns.dev | [LinkedIn](#) | [GitHub](#) | thatdns.dev

Software Engineer | 4+ years in Fintech & Gaming | Toronto, ON

SKILLSET

C++, C#, Python, Golang, JS (React), MongoDB, AWS, Kubernetes, Elasticsearch, Algorithms

PROFESSIONAL EXPERIENCE

Parallelz

Toronto, ON

Software Developer

May 2025 - Present

- Developed the serverless backend (Golang) for a web-based gaming platform, connecting users to Android games running in Kubernetes-orchestrated containers, reliably serving **500+** DAU.
- Built a Docker-based automation testing system on Oracle Cloud Infrastructure to test **1000+** Android apps, using logcat parsing, playwright automation, and AI-based visual analysis of app screenshots.

Tier 9 Game Studios

Toronto, ON

Software Developer

Sept 2024 - April 2025

- Built multiplayer infra in Java for a game using Unity DOTS (C#), enabling 1K+ players with **<50ms** sync latency.

D.E. Shaw & Co. (Hedge Fund / Investment Firm)

India

Senior Member Technical

Jan 2023 - Aug 2023

- Redesigned and developed a Python-based options trading system using async/multiprocessing for concurrent operations and Factory/Observer design patterns for scalability, driving **\$3-5 million** in annual profits.
- Engineered a real-time notification system (Python/Node.js + React) with live updates from Mongo in **<100ms**.
- Mentored **3** new hires on trading tools and led an intern to build a React + Elasticsearch auto-complete feature.

Member Technical

May 2021 - Dec 2022

- Developed a framework for systematic report approval, using React & Redux, reducing approval time by **40%**.
- Built real-time log analytics with ELK Stack, enabling **10x** faster diagnosis & **20%** less downtime via alerts.
- Guided an intern to develop an ops task management tool, slashing troubleshooting time by **60%**.
- Ranked among top **5%** performers, earning early promotion to Senior Member Technical in 1.5 years.

EDUCATION

Sheridan College

Oakville, ON

OCGC, Game Development Advanced Programming; GPA: 3.96 / 4.0; **Top of class** (Medal Awardee) Sept. 2023 - Aug. 2024

Indian Institute of Technology (IIT) Patna

India

B.Tech., Computer Science and Engineering; GPA: 3.45 / 4.0; **Top 0.7%** in 1.3 million for admission Aug. 2017 - May 2021

SIDE PROJECTS

Shatter Space [Ubisoft NEXT] (Individual):

C++, 3D Math, OpenGL

- Created an ECS-based game engine using entity archetypes and object pooling to boost cache performance.
- Implemented a math library with 3D-to-2D projection matrices and O(logn) BVH tree collision detection.
- Built a high-efficiency physics simulation system capable of real-time rendering of **>10,000** objects.

Slime Hunter (Group of 5): 3D top-down action RPG Game

Unity, AI, C#

- Developed different enemies AI using Steering Behaviours and Finite State Machines (FSM).
- Engineered a dynamic Quest and NPC dialogue system using Ink, contributing to a rich narrative experience.

PUBLICATIONS

ADAM: Automatic Detection of Android Malware

SecITC 2021 (paper)

- Engineered a mobile application implementing a ML algorithm in TFLite for detecting potential threats.
